

## REACH CERTIFICATE OF COMPLIANCE

**Company: Beswick Engineering Co., Inc.**

Address: 284 Ocean Rd  
Greenland, NH 03840

Contact person: Dana Worthley  
Title: QA Manager  
E-mail: dhw@beswick.com  
Telephone: 603-433-3313

**Annex XIV:** To the best of our knowledge as of 1/17/2022 all product(s) manufactured by above-mentioned company **do not contain** any of the 54 REACH Substances of Very High Concern (SVHC) on the authorization list in concentrations greater than 0.1% by weight as outlined by the ECHA (European Chemicals Agency).

**SVHC Candidate List:** Brass product(s) manufactured by above-mentioned company **do contain** lead. To the best of our knowledge as of 1/17/2022 lead is the only substance in the 223 REACH Substances of Very High Concern (SVHC) candidate list from the amendment dated 1/17/2022 present in any product(s).

Brass components do contain lead in concentrations greater than 0.1% by weight. Lead is only present as an alloying element in brass. Total lead content can vary, but will not exceed 4% by weight.

**Restriction of Chemicals Annex XVII:** To the best of our knowledge as of 1/17/2022 all product(s) manufactured by above-mentioned company comply with the specific restrictions presented in Annex XVII. It should be noted that although the following substances aren't in violation of the restrictions imposed upon them in Annex XVII, they are present in products produced by above-mentioned company.

**Lead** – Less than 4% by weight as a copper alloy element in brass products.

**Nickel** – Present on nickel plated parts as well as an alloy element in stainless steel components up to 14% by weight.

Product users are responsible for determining their own compliance to Annex XVII based on their usage of the final product.

**Future:** We certify that future updates to the REACH provisions will be monitored and followed to the best of our ability to do so.
