Beswick Engineering TSCA Statement

The U.S. EPA published new rules under Section 6(h) of the Toxic Substances Control Act (TSCA). These new rules restrict the usage and importation of five chemicals:

- 2,4,6-tris(tert-butyl)phenol (2,4,6-TTBP) – CAS# 732-26-3
- Hexachlorobutadiene (HCBd) – CAS# 87-68-3
- DecaBDE – CAS# 1163-19-5
- Phenol, Isopropylated phosphate (3:1) (PIP 3:1) – CAS# 68937-41-7
- Pentachlorothiophenol (PCTP) – CAS# 133-49-3

Beswick Engineering Compliance:

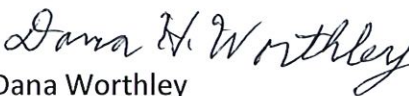

-Polyurethane Tubing (MUT series): Polyurethane tubing sold by Beswick Engineering Co., Inc. does not contain any of the five substances listed in Section 6(h).

-Full Product Line: Through our due diligence we do not believe that any other parts manufactured by Beswick Engineering contain the above chemicals. We have reviewed all MSDS sheets and TSCA guidance documents that have been provided to us by our suppliers. Due to the large number of suppliers we use and number of materials that we stock as standard it is not always possible to have current declaration data for every component. For this reason, we have also reviewed the EPA's guidance for likely sources of the above five chemicals and did not identify a supplier or product listed among them currently used by Beswick Engineering.

If you would like to review the EPA guidance, you can do so here:

<https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/background-documents-persistent-bioaccumulative-and>

At Beswick Engineering we will continue to maintain communication with our own suppliers as part of our due diligence. Should our compliance status change, we will provide prompt notification to effected customers.
